CHANGES SOUGHT IN VETS AID LAWS

LEGISLATIVE CHAIRMAN GIVES
OUTLINE OF PROGRAM

CREATE MEDICAL CORPS IN VETERANS' BUREAU

Legion Asks Rating of Permanent and Total Disability for Active Tuberculous Patients; 50 Per Cent Disability for Arrested T. B. Patients.

Washington.—More liberal treatment of disabled veterans and enactment of a universal draft law are among the principal recommendations the American Legion will submit to members of congress.

John Thomas Taylor, vice-chairman announced the legion's program also of the national legislative committee, would include another drive for enactment of a law permitting retirement of disabled emergency officers and would seek amendment of the adjusted compensation act to clarify the provision requiring dependents to make "lengthy and objectionable affidavits."

Among changes to be sought in the present law relating to care of the disabled, the legion will ask a rating of permanent and total disability for active tubercular patients; a rating of permanent and total disability for men who have been rated temporary and total for twelve months for men who are still rated so; extension of period for insurance conversation; creation of a permanent medical corps in the veterans' bureau and removal of limiting dates on rehabilitation.

The universal draft bill sponsored in the legislative program would give the president authority to take steps to stabilize prices of commodities, to draft into service all persons between the ages of 21 and 30 years and to proclaim the material resources and industrial organizations of the country under government control during the emergency.

FRENCH LOSSES IN MOROCCO AND SYRIA TOTAL 17,000 MEN

Paris.—France has lost more than 17,000 men and has spent more than 3,000,000,000 francs in Morocco and Syria since she took over the protectorate of Morocco and assumed the League of Nation's mandate over Syria.

Such is the information imparted to the finance committee of the chamber of deputies by Premier Painleve.

In Morocco, 2,176 men were killed and 8,297 wounded, and in Syria, 6,626 were killed, wounded or are missing. The cost in Morocco had been 950,000,000 francs and in Syria more than 2,000,000,000 francs.

The premier added that he would ask parliament for additional credits of 300,000,000 francs for the period of July-December, 1925, for the Moroccan campaign.

Approve Armament Meeting

Berlin.—Any American initiative in favor of calling a disarmament conference may count upon the unqualified approval of German official circles, which go even so far as to assert that such an understanding would automatically suggest itself as a logical sequel to the Locarno conference. No formal action seconding an American proposal would likely be forthcoming from German quarters before the Locarno agreements were ratified at London. Government leaders, however, believe that a second international arms parity would hold out more auspicious prospects of ultimate success.

Coolidge May Act in Coal Strike

Washington.—So serious is the eastern fuel situation that great pressure is being brought to bear upon President Coolidge and his cabinet by members of congress to take steps to settle the anthracite coal strike. While the administration has apparently turned a deaf ear to such appeals, it is known that they are giving them serious consideration and it is possible that the president will shortly make an important move.

Says Pact Will Weaken Alliance

Warsaw.—Professor Stronski, one of the leaders of the national Christian party, declared in the diet that the Locarno pact had weakened the Franco-Polish alliance, which heretofore had been direct, but now had become merely conditional and dependent upon the League of Nations. He said his party would vote against ratification.

50 Killed, 43 Hurt in Riot

London.—An Exchange Telegraph dispatch from Cairo says that 54 persons were trampled to death and 43 injured when mounted police endeavored to clear a passage for a dignitary who was trying to visit the annual fair at Tanta.

POWER FIGHT IN CONGRESS LOOMS

DIAMOND DAM ON THE COLORADO
RIVER BIG PROJECT

PRIVATE PROJECT IS CAUSING OPPOSITION

Seven Western States Have Reached Fever Heat in Opposition to the Private Project, According to Evidence Before Power Commission.

Washington.—A new water power development fight, involving a potential "billion-dollar" project on the Colorado river and far transcending the Muscle Shoals row, appeared on the horizon of the new congress over the efforts of private interests to obtain a federal license to build a dam in the Grand Canyon of the Colorado.

While the federal power commission, composed of Secretary of War Davis, Secretary of Interior Work and Secretary of Agriculture Jardine, withheld decision on issuing the license, the senate irrigation committee left for the west to hold a series of public hearings in the territory directly affected. Whether or not the license is granted by the commission, a battle will develop on the floors of congress as soon as the committee completes its investigation. Opposition to the private project has reached fever heat in seven western states, according to evidence placed before the power commission at public hearings. Protests were voiced in person by Governor Nellie Ross of Wyoming, Governor George H. Deern of Utah and state representatives from California, New Mexico, Arizona and Colorado.

The application for permission to build the dam was made by James B. Grand, who "staked" a dam site at Diamond Creek, Colo., ten years ago. If granted the license, Grand would erect a dam across the Colorado river, with a minimum flow of 10,000 feet a second, use the development for manufacturing electric power and pay the government nothing but taxes.

Bitter opposition arose against Grand's proposed project because, under priority water rights approved by the government he would be entitled to virtually exclusive use of all water flowing through the Colorado river.

Other proposed dams, including the much discussed Boulder dam project, would have to be erected below Grand's project, because of these restrictions, and their usefulness in irrigating the surrounding country would depend on the amount of water released by Grand's dam. Under these circumstances it is said Grand's license, if granted, would be worth \$50,000,000 to a power corporation.

Whatever the commission's final decision, all indications point to an airing of the whole subject in congress.

UNITED STATES FIRMS IN CHINA SEE RUIN

Shanghai.—The United States government has instituted suit for the collection of corporation income taxes from American firms in China, which if prosecuted will result in bankrupting most of the American business in China, it is the general belief of business men. The first suit is against a dealer in American motor cars for \$30,000 gold, according to the district attorney, who says more suits are pending.

The officials stated that a few local American firms had paid income taxes owing to the belief that Congress would grant relief through the passage of a China trade act intended to place Americans on an equal basis with their British, Japanese and German competitors, but congress did not pass the law until the last session, with the result that few firms paid their taxes, and now if the government persists in putting on the screws, combined with the depression caused by the Chinese chaos, most of the American firms either will go into bankruptcy or transfer under British registry. The suit is creating a sensation, eclipsing the local war and political situation.

ENGLAND'S BOTTLE GOODS ARE PRODUCING SNAKES

London.—An extraordinary story of a snake in a bottle of stout is reported from Folkestone.

A customer bought a bottle of stout at a local store for supper. After drinking half a glass of the beverage he was starting to pour out some more of the liquid when the head of a snake appeared suddenly at the opening of the bottle.

The bottle and its contents were taken to the sanitary inspector, who extracted a grass snake measuring sixteen inches long. The reptile was curled up in side the bottle, which was properly sealed when purchased.

Golden State

News of Interest to All

Oakland issued 1,267 building permits, involving total construction costs of \$3,000,070, during September.

The new Colusa, Colusa county, Union High school building, for which \$200,000 bonds were voted, is in course of construction.

P. J. Connolly of Stockton was re-elected president of the Central California Wool Growers' association at an annual meeting held in Stockton.

The Alturas, Modoc county, box factory, under the management of J. G. Linkenback, has been running overtime since reopening two weeks ago.

A royal welcome will greet delegates at the fifteenth annual supreme session of the Ancient Egyptian Order of Scots in Stockton, San Joaquin county, November 5, 6 and 7.

Los Angeles county road gangs are putting the final touch to the new \$55,000 road which extends from Ventura boulevard to Seminole Hot Springs, a distance of eight miles.

W. A. Shepard of Auburn, Placer county, was appointed by Governor Richardson as state commissioner for the Nevada transcontinental highways' exposition, to be held in Reno in 1926.

The new \$600,000 Community Hotel being built by residents of Bakersfield and Kern county at Bakersfield, is being rushed to completion and will be ready for occupancy by March 1, 1926.

Calls for cotton pickers are coming to the free employment bureau of the Porterville, Tulare county, chamber of commerce, demands being from six to twelve pickers from almost every grower.

A freight rate amounting to one-half the regular charge will be accorded by the principal railways of the west to exhibitors of dairy cattle at the Pacific Slope Dairy show, Oakland, November 14-21.

Figures prepared by Deputy County Auditor G. W. Miller of Tuolumne county show that the cost of conducting the business of Tuolumne county runs very close to one-third of a million dollars yearly.

Contract has been awarded for the construction of the new \$250,000 home of the Boys' and Girls' Aid society in Altadena, Los Angeles county. The building is expected to be the equal of any of its type in the state.

Provided the proper progress is made in securing the rights-of-way for the laterals, the Yuba City, Sutter county, trustees will call for bids in December for the construction of a new sewer system for Yuba City.

G. H. Hecke, director of agriculture, announces that the fifty-eighth California Farmers and Fruit Growers' convention will be held in the assembly chamber of the state capitol building, in Sacramento, on November 5.

A total of three thousand live alfalfa beetles were captured by state insect inspectors during the inspection period closed a short time ago. This was brought out in figures released recently by the state department of agriculture.

The Golden State cannery in Cucamonga district, San Bernardino county, has closed its 1925 deciduous fruit season with the completion of a pack of 135,000 cases of canned peaches and apricots. This breaks all former records in the history of the plant.

With the completion of the new junior college only a matter of a few months away, Sacramento is prepared to take her stand as an educational center of the state, offering to the child and student every advantage possible for the securing of an education.

A rabbit club, with boys of the Alameda district, Los Angeles county, competing, has been organized with W. H. Ziegler, a Downey breeder, as local leader. Each member has a unit of five does and a buck. The contest opened October 1 and closes March 31.

Aligning with the interests that are fighting to maintain the high quality of cotton in the San Joaquin valley, the Fresno Chamber of Commerce and the Fresno County Farm bureau fired a broadside in the campaign to educate cotton growers to demand quality ginning.

Governor Friend W. Richardson announced that he has approved the action of the state fish and game commission in selecting one hundred acres on the state hospital property at Napa, Napa county, as the site for the game farm to be established by the commission.

Formal answer to the action of the Yolo Water and Power corporation of Woodland, Yolo county, against the Yolo Water and Power company was filed in the superior court. The answer denied the allegations of the corporation that the company was in debt to the corporation to the amount of \$263,501.84, and attacked the legality of an attachment suit brought by the corporation.

CLUB FLOWER SHOW HERE NOV. 6

The committee in charge of the chrysanthemum show and sale, and evening party have perfected arrangements for the event which promises to be a successful event of the coming month.

On the afternoon of November 6, the display of flowers will be held and the lovely blooms will be on sale. Delicious punch and candy can also be bought.

For those who cannot enjoy the afternoon and others who like to meet their friends and neighbors around the card or mah jong tables, a party has been planned. You can reserve one or more tables at \$2 per table and entertain some friends, or a group may combine at 50 cents per person. A number of reservations are in the hands of the committee but provisions will be made for all who notify them in advance. Phone Mrs. R. Alison or Mrs. R. H. Hyde.

As previously stated the proceeds will be used to reduce the building debt on the Library which is in the name of the Country Woman's Club.

CAMP FIRE PARTY

Twanikota Camp Fire group gave a Halloween party Tuesday evening at the kindergarten rooms of the grammar school. Beside the guardians, Miss Henderson and Miss Hostetler, Miss Farman and several parents were guests.

Among the members of the group and their friends were:

Caryn Lund, Dorothy Clark, Helen Buck, Vesta Blyther, Veva Nichols, Phoebe Payne, June Cushig, Josephine Cosner, Dorothy Smith, Thelma Fugatt, Marjorie Prout, Esther Carleton, Esther Sorenson, Edna Soutar, Gladys Burns, Wanda Grizzle, Viola Blyther and Freida Atkins.

BASKETERS AT WORK

Campbell lightweights played two games of the league series last week, breaking even on the count.

D Class—Campbell vs. Jefferson, won by Campbell; score 7-2. C Class—Campbell vs. Jefferson, Won by Campbell. Score 13-4.

Campbell B Class played the Y. M. C. A. light weights of San Jose Friday evening losing by the close score of 9 to 13.

Class A boys beat the local town tossers by a 15-14 score. The "old men" are still making excuses for their short score.

C's and D's will play the Santa Clara highs today at Santa Clara.

The puncture vine is gaining quite a foothold in Imperial county. At a meeting in El Centro, the county board of supervisors authorized an appropriation for the purchase of a truck and spraying apparatus to wage war on the pest. Distillate, which kills the vine as well as the seed pods, is used.

The state department of agriculture has announced that the work of the bureau of dairy control of the department, together with phases of the work of other departments which touch upon dairy activities, will be exhibited at the Pacific Slope Dairy show in Oakland November 14 to 21.

Ship Constitution Tablet Unveiled

Boston.—The old frigate Constitution is 128 years old. A tablet commemorative of the launching of this oldest of United States warships on October 21, 1797, was unveiled aboard the Constitution in the navy yard here.

State Solon Dies at Stockton

Stockton.—John T. Lewis, California state senator from 1908 to 1912 and vice-mayor and councilman of Stockton since 1923, died suddenly at his home here. He had been in excellent spirits and apparent good health.

New Plane Motors

London.—The Evening Standard reveals that two new Napier engines have been shipped secretly to the United States to be mounted on the Gloucester Napier planes, which will be piloted by British aviators in the race for the Schneider seaplane cup at Baltimore.

NAVY-ROOSEVELT DAY OBSERVED IN CAMPBELL

Navy Day-Roosevelt Day, was very fittingly observed by the community and schools Tuesday afternoon.

The assembly was called in the new auditorium where E. W. Allen, acting as chairman, called the audience to order.

Miss Marie Mace, music conductor of the Grammar School, directed the singing of America by the assembly after which Rev. F. C. Farr gave the invocation.

W. T. Alexander, of San Jose, who has spoken at former occasions in Campbell, was the speaker of the hour and gave a very interesting address on "Theodore Roosevelt, the Man, the Soldier, the Statesman and the American." He gave some very good seed for thought for both young and old in the method and spirit of doing the hard things and overcoming obstacles. From a rather weakly boy, Theodore Roosevelt developed a rugged and robust man that loved and lived the "strenuous life" and became one of the nation's biggest men.

Richard Shelley exhibited the notable shovel with which Mr. Roosevelt planted the giant sequoia on the high school grounds and gave a short essay on the particulars of the planting.

Adjournment was then taken to the grounds where to the strains of "The Star Spangled Banner" the flag was raised. The salute was fired by a squad of naval reserves from San Jose.

As the exercises are held on this historic spot from year to year one can almost see this great tree growing and ever widening an influence for the love of the great outdoors which meant so much to the planter during his life.

CHURCH LADIES ENTERTAINED

The ladies of the Methodist congregation were the invited guests of the Ladies' Aid Thursday afternoon last at a very charming social afternoon.

The Community Hall had been beautifully decorated with chrysanthemums and autumn foliage and an interesting program was carried out.

The guests were divided into groups according to the locality from which they had come and were asked to tell some incidents of the autumn season in that section.

Mrs. Harry Williams entertained with some pleasing readings and Mrs. J. D. Blaine sang two solos and the little Misses Veva Nichols and Dorothy Clark sang a duet. Mrs. D. H. Cramer acted as accompanist for both.

Attractive autumn favors, made by Miss Saver's room at the Grammar school, accompanied the dainty refreshments.

The committee who arranged and carried out the affair were accorded due praise for the very pleasant afternoon.

BLACK-FACE SHOW COMING SOON

The minstrel show is becoming more interesting as rehearsals progress and the various members of the chorus bring in their new jokes to liven up the practice. Several of the boys have their stunts well in hand and at this early date a real enjoyable entertainment is promised.

One of the big drawing features will be some new stunts by pupils of Vaudeville Putnam Sanders. These in themselves will be worth more than your ticket will cost.

Another angle of the proposition that must not be lost sight of is that this show is for the benefit of our library fund which is being used towards payment for this splendid building, the pride of the community.

GRANGE PLANS VISITORS' RECEPTION

As the Odd Fellow's Hall is being given a new dress the Grange met in the banquet room Tuesday evening.

The orchard committee reported that a meeting of orchardists was to be held at Sacramento at an early date to discuss means of insect pest control. The most important thing at present is to keep the Mediterranean fly out of the country as it is one of the most destructive insects known, with no means of control yet discovered. E. K. Clendening was appointed a committee from the Grange to attend this meeting.

The reception committee to the delegates of the National Grange who are expected to pass thru Campbell on the 6th or 7th of November on the auto trip thru the county reported progress. Mr. W. R. Coupland gave an interesting talk on the superior methods of disease control of trees and plants in British Columbia. Messrs. Keesling, Harmes Smith and others entered into quite a spirited discussion of a new method of renewing the growth and vigor of old orchard trees. No very definite results however seem to have been accomplished yet.

Two songs and music at the piano by Mrs. Ada Butts were well appreciated.

Mr. J. Knack gave a very interesting and instructive talk on radio receiving and sending sets. Mrs. Parkhill read a poem, and Mrs. J. D. Blaine sang two songs, accompanied by Mrs. D. H. Cramer. Mrs. Barnes also read an article on "A Flower Garden on Stilts", all of which was thoroughly enjoyed.

Six new applications for membership were received. It was announced that the Boy Scouts of San Jose would give an exhibit in Campbell at an early date.

CAMPBELL COUNCIL PLANS CAMPAIGN

The local organization of the Campbell Community Council was represented before the budget committee of the Community Chest in San Jose by C. H. Whitman, past president of the Council, and Mrs. L. F. Shaw, secretary. The following budget was approved:

Campbell Relief Society	\$400.00
County Y. M. C. A.	500.00
Campbell Library Assn.	600.00
Camp Fire Girls	400.00
Emergency Fund	100.00
Our part in the Santa Clara County budget	1,000.00
Total	\$3,000.00

The date of the local drive is set for November 9th to 19th, and will be in charge of Ralston Allison, the newly elected president of the Council. It will be noted that the amount to be raised here is the same as last year.

Needless to say, Campbell has never failed to go "over the top" and since the institution of one drive instead of several has been found so practical and efficient, we are proud to make our campaigns go over on record time as well as for the required amounts.

One word of reminder: The solicitors who will call on you are busy men and women giving of their time to make our community welfare work a reality. They enjoy asking you for money about as much as you would under like circumstances. Please do not make them come again and again. Plan what you will give and make it as generous as you can, and be ready to make your pledge when the solicitor sees you.

The first basketball team of the C. U. G. S. played the C. U. H. S. 10's in the gymnasium Tuesday and won 8 to 4. The grammar team played a good game and made a fine showing for not having a coach. Frank Ferro, Leland Lea, C. Berger, Ben Lamorte and Stanley De Selle, compose the grammar quintet.

STRIKING AT A GREAT TRUTH

Refusing to support any movement toward the enactment of blue-law legislation, the Lutheran church has issued a statement through the American Lutheran Publicity bureau as follows. "We deplore the activity so openly displayed by a large part of American Protestantism in secular and political affairs, and hold that such activity is a diversion of force from the exclusively spiritual mission of the Christian church."

This significant statement may bring forth expression of divided opinion among churchmen, yet there is a growing tendency to more sharply define the objects of all institutional activity. It appears to be based upon the principle that the primary objects of an organization or institution once defined, that institution or organization finds its greatest strength in adhering closely to its primary objects. Many hold that the church, while not directly engaged in the advocacy of temporal legislation, should dominate its members with spiritual force that, as individuals, they will go out into the world fitted to give expression to the church's ideals in the secular channels of activity devoted to just and worthy legislation.

IS IT A CRUEL WORLD?

James Tobin, the builder of San Francisco's first cable car line, the first of its kind in the United States, has left an estate of only \$1015. He spent his declining years selling newspapers on the streets, after the fire of 1906 had wiped out his holdings from large contracting enterprises.

This raises the question of why do many illustrious characters die poor? Not even the social-ogist knows the answer. Poets, painters, authors, scientists too often spend their lives in obscurity. Fame, in the highest salaried profession in the world—the motion pictures—is a treacherous and fickle mistress. The stars of yesterday look for bread today. It would seem that their past achievements ought to carry them through to some activity that would at least keep the wolf from the door. But in many cases it does not work that way.

If merited fame will not last through the short span of life sufficiently to insure to its possessor a continuance of his daily bread, what a lesson the less fortunate among us should learn in the art of saving for a rainy day!

EXPERIMENTING IN WARCRAFT

Representative Martin Madden, of Illinois, denounces the way money has been spent by the air and navy departments in the purchase of useless equipment.

As long as nations "experiment" with war instead of peace, experiment with international discord instead of international friendship and brotherhood, experiment with racial differences instead of recognized and harmonious racial distinctions, we may look for a little money frittered away here and there in trying out a new gun, or new kind of bomb or propellor.

There is a good deal of superficiality going on in the various "investigations" so current in present-day affairs. Down deep in the hearts of the countrymen is a desire to see a greater effort toward removal of causes than adjustment of effects.

WHY REGIONAL PLANNING IS COMMENDABLE EFFORT

"A city plan for the next half century's development in San Francisco and contiguous territories such as the Regional Planning Association is trying to formulate requires carefully calculated combinations of the ideal and the practical," says the San Francisco Chronicle.

The purpose of the plan is to give general direction to the growth of communities in the bay district so that each constructive effort may harmonize, first, with a broad scheme of development within that community and, second, with the program of all communities in the region. This region, with San Francisco as its logical center, embraces San Mateo, Santa Clara, Alameda, Contra Costa, Sonoma, Solano and Napa counties.

It is the experience of most large cities that costly mistakes, often irreparable, are made by piecemeal development, where each project is regarded as an entity rather than as an interlocking part of a general plan.

An example of this is the layout of streets north and south of Market, which, meeting the main thoroughfare at acute angles, have burdened San Francisco with a traffic problem that is most difficult of solution. It is too late to correct this error in planning, but equally serious, if not similar, errors may be guarded against by a comprehensive plan.

The aspirations of each community in the region and of groups within each community must be taken into consideration but cannot be written into the plan unless they harmonize with its general scope. The best that such a plan can offer is a program subject to changes now unforeseeable.

Who remembers when we thought Another sign of world peace is in we had to keep a black suit on tap in naming a pair of Japanese twins the clothes press for funeral purposes? Laverne and Conrad.

Determination, Not Income Builds Savings Accounts

No matter how small your income, something can be set aside from it and placed in a Savings Account. A little determination to get ahead is all you require. You can open a Savings Account in the Mercantile Trust Company of California with as little as One Dollar, and it will earn 4 per cent interest.

There are many other ways in which this bank can start you on the road to a competence. We would be glad to have you call and let us explain the services and facilities we possess for solving your financial problems.

Special:— Hallowe'en Pumpkins—in Cans

J. D. B. came pretty near to ordering some pumpkins for Hallowe'en; but when he thought of how hard a pumpkin is to cut up, how folks sometimes even cut themselves instead of the pumpkin, he decided to make a special of pumpkins in cans. Not for jack o' lanterns, of course, but for pies. Officially, the pumpkin pie season starts with Hallowe'en, and here is the special:

Your choice of
JHN PUMPKIN
DEL MONTE PUMPKIN } 18c each; 2 for 35c.
LIBBY'S PUMPKIN

Edgemont Ginger Snaps: Folks who never liked ginger snaps before are boosting for these. They are being introduced by us in Campbell on the strongest kind of customer recommendation. Box, 1 3/4 pounds, 40c.

Carl Cutting's Honey has the genuine bee tang. This is fine honey. Quart jars, 65c.

Red Apples, selected, first quality Johnnathans that will polish beautifully. Dozen, 30c.

Walnuts: honestly, our new crop walnuts have the plumpest and whitest and finest-flavored meats that ever delighted your eyes or thrilled your palate. Don't even think of buying any others. Per pound, 35c.

Liquid Sunshine will polish silverware and remove stains from woodwork. It's so wonderful that we'll say a deal about it later. Large bottle, 50c.

Mrs. Hattie Valencia spent last week in Oakland.

Oliver Yates, of Santa Rosa, is here for a six weeks visit with his sister, Mrs. A. Y. Hoag and niece, Mrs. P. B. Payne.

Miss Miriam Skiff is expected to reach home today or tomorrow from a visit to several months in New York, coming via the southern route.

Miss Violet Otterman has been confined to her home this week with an attack of the ever popular flu but hopes to resume her school duties next week.

J. E. Gamo has named his new mission John 3:16. This is undenominational and services will be held Friday evening and Sunday afternoon at 3 o'clock.

Regular meeting of grammar school P. T. A. Tuesday p. m. The program in charge of Mrs. Bradley will begin at 2:30 sharp so all are urged to be present on time.

Mr. and Mrs. D. H. Cramer and Mr. and Mrs. C. E. Hanger motored to Stockton Saturday to visit Miss Olive Hanger and other friends at the College of Pacific.

Ye editor is in receipt of a card from Rev. Geo. Marsh written on the steamer in the Mediterranean telling of a fine voyage and stating their expected arrival at the port of Athens on September 30.

Mrs. Margaret Hobby, of Shelby, Michigan, an old-time friend of Mr. and Mrs. C. Inman, has been visiting them the past week. She goes from here to Los Angeles to visit her son and family.

Mr. and Mrs. J. H. Campbell will sail Tuesday for Honolulu where they will spend a portion of the winter with their son, Delbert and wife. They have been planning and looking forward to this trip for some time.

Mr. and Mrs. A. W. Wellington have had as house guests for the past week Mr. and Mrs. Thos. Murdock Smith, of Pasadena. Mr. and Mrs. Smith are enroute home from a summer vacation in Buffalo, N. Y.

Mr. and Mrs. Gruver Rubell and two children were over from Merced over the week-end with his parents, Mr. and Mrs. C. F. Rubell. Harriet Smith and Claudine Rubell were down from San Francisco for Sunday.

Miss Winnie Grizzle and her mother autoed home from Dorris, arriving Sunday night. The lumber mill, and buildings with the school have been moved to Dorris and Miss Grizzle is at home during the rearrangement of the school.

Monday evening the Geo. E. Hyde truck, driven by Merle Bibb, and A. B. Covey's car were in collision near the rear door of the company's warehouse. The Ford was badly damaged but neither Mr. Covey nor his son who were in the machine were injured.

Chronic Flivver complaint is often caused by high flood pressure.

The average income of the automobile owner is figured at about 2 a. m.

CONGREGATIONAL NOTES

The week of instruction in the interest of good church music, led by Mrs. Frank Hodgdon, of Berkeley, will begin Sunday, November 8, in the Congregational church.

Mrs. Hodgdon is an enthusiast along this line and says that any one who can talk, can sing, and she proceeds at once to demonstrate it. She will have a class for children in the afternoon and one for young people and adults in the evening each day during the week of November 8-15.

The Woman's Missionary Society will meet Thursday, Nov. 5, at the manse. This is the first meeting on our new study book, "New Days in Latin America," and a cordial invitation is extended to all the women to attend. The meeting is at 2:30.

NEW PIT RIVER POWER PLANT

Announcement is made by F. A. Leach, Jr., Vice-President and General Manager of the Pacific Gas and Electric Company that orders have been approved for the construction of the Pit No. 4 dam and intake which is the next project in the Company's Power Development program on Pit River in Shasta County. This diversion dam is to be located about one and one-half miles down stream from Pit No. 3 Power House which was placed in operation July 18th, of this year.

The Company's engineering department has completed detail plans and designs for the dam and tunnel intake structure. The new dam will raise the water level in Pit River forty feet and will have a crest length or width of four hundred ten feet. The raising of this water level will form a reservoir of 1,550 acre feet, backing the water up to the Pit No. 3 plant; thereby making a second large lake in Pit River Canyon.

Construction of this dam calls for an expenditure of \$1,750,000. Cost of the entire Pit No. 4 project, exclusive of railroad and transmission lines is estimated at \$14,500,000. The work approved will be carried on through the winter months, employing at a minimum of 300 men.

About ten miles of additional railroad construction, costing \$530,000 will be extended from the Pit No. 3 Power House down the Pit River Canyon to the Pit No. 4 Power House Site. The road about four miles in length has been completed to the dam site. This Pit No. 4 development is the fifth of a series of eight plants to be built in the Pit River Section, Shasta County, at a total cost in excess of \$100,000,000. Hat Creek No. 1 and No. 2, Pit River No. 1 and No. 3 Power Houses with an installed capacity of 235,000 horsepower have been completed and are now in operation.

O. W. Peterson, Engineer of General Construction and the men who handled the construction of the Pit No. 3 job under the direction of P. M. Downing, Vice-President in charge of Electric Construction and Operation, will be in charge of the construction of the Pit No. 4 Plant.

PRUNE AND APRICOT GROWERS RECEIVE CHECKS

The last of 53,500 checks, aggregating \$4,314,316.71, left the offices of the California Prune and Apricot Growers' Association last week, representing payments to grower members made in the four-month period since July 1, and, for the first time in its history, putting that organization upon a current basis. At the same time, while deliveries of prunes to the association are 14,000,000 pounds less than at this time a year ago, total sales to date are approximately 300 percent of the total at this time last year, while apricot sales are virtually 100,000 pounds of last season's record at this date.

Peruvian Wash-Out Losses

So vital are the railroads in Peru to business that washouts following torrential rains this year caused a depression during which there were bankruptcies, and resumption of traffic brought a marked and speedy change toward normalcy.

American Fashions Rule

American fashions are commanding the style of output in some European centers, which are producing bands, shoulder straps and ribbons of rayon.

Boy Scout Subsidy

The Japanese government has granted a subsidy of about \$250,000 to a school which will train boy scout leaders.

Where is the parking limit? It's the limit nearly everywhere.

Campbell, Calif.

Congregational Church, Sun. Nov. 1

Next Sunday evening at 7:30 we are to have a third in the series of papers on vital themes having to do with the religious life. The theme for this Sunday is, I Believe in Jesus Christ.

We place Christ at the center of the faith we hold. He has revealed for us the character of God. He has taught us to say: "Our Father who art in heaven." In that name he has put those qualities which the Christian has come to revere; and we trust the God of love who is near while we reverence the God who is above us.

The morning sermon by the pastor will be on the theme, "Gifts Magnified."

The Bible School meets at 9:45 a. m., followed by the morning service at 11 o'clock.

FOR SALE—Upright-Schumacher piano. In good condition. Phone Campbell 22F3. C. E. Hanger.

FOR SALE—Offering my home on Los Gatos road, at a big discount. See local real estate dealers or write to owner, Bertha Barron, Route 1, Box 250, Watsonville, Calif.

FOR SALE—For Fall hatchng, Rhode Island Red selected Eggs. Also eggs for domestic use. C. E. Case, 49 S. Central Avenue, Campbell, Calif. 14-1f

UNEARNED CRITICISM

By FRANCIS H. Sisson

Chairman, Public Relations Commission American Bankers Association

There has been some disposition to criticize the administration of the country's banking system for the sudden collapse of prices and curtailment of credits in 1920 and 1921, and the subsequent financial difficulties of the farmers. As a matter of fact, whatever blame may attach to bankers must be for the too generous financing, in many cases, of speculative investment in farm property during the period of inflation. If any just criticism could be directed at the manner in which the Federal Reserve System functioned in this situation in the opinion of many it would be that the Reserve banks delayed too long in raising the rediscount rates. An earlier effort might have stayed the process of inflation.

Francis H. Sisson

The collapse of 1920 was by no means confined to agriculture, and was the inevitable sequel to the inflation period. All branches of business suffered in this period of reaction and perhaps none more than banking, against which this criticism has been leveled. The financial situation of the farmers was greatly aggravated by the fact that the high land values and high prices of agricultural products had led many farmers to incur obligations based on the inflated values. If the farmer was victimized at all, indeed, he was the victim of too much rather than too little consideration. The real progress which has been achieved in agricultural finance in recent years lies more in the intelligent distribution of farm credit than in volume.

With agencies now functioning for the provision of ample credits for the American farmer, his enduring success depends upon the wisdom and foresight with which he meets the problems of production and marketing. More than ever before, his activities must be regulated with reference to world conditions, and his profits, like those of the manufacturer or merchant, will reflect the measure of his success in adjusting his activities to these conditions.

BANKERS HELP

The banks of Linn County, Oregon, are showing more enthusiasm than ever this year in behalf of a county corn exhibit similar to that held last year at the Linn County Fair. Last year's exhibit was the result of a contest for a prize offered by a number of local banks. This was so successful that this year ten out of the eleven banks in the county will subscribe to the effort.

The Agricultural Committee of the Alabama Bankers Association has recommended that a scholarship fund be established for the education of worthy young men and women along agricultural and home economics lines. It is estimated that if each bank in the state were to contribute 25 cents per thousand capital, five to six thousand dollars per annum would be realized.

The Agricultural Committee of the Oklahoma Bankers Association, in its report, recommends that the bankers see that a competent agent is appointed in each county and that he has a degree from some agricultural college. They believe that the agricultural possibilities of the state should be better advertised and that each county bankers association should do some work along that line.

Searcy County Bankers Association, Arkansas, entertained as its guests recently some seventy-five farmers and business men. The result was the organization of the North Central Arkansas Agricultural Association. Its purpose will be to co-ordinate the efforts of the farmers and business men in promoting a better agriculture. Searcy County bankers are giving 100 settings of purebred eggs for distribution to the boys' and girls' clubs in the county.

H. S. Mowrer, chairman of the Agricultural Committee of the New Jersey Bankers Association, together with H. J. Baker, director of extension work in the College of Agriculture, made a complete tour of the state this spring, calling on the county agents and agricultural committees of the various county organizations to get a definite line-up on the work done and the plans for the coming year. Ways and means for furthering the program of the state committee were considered at these conferences.

A committee representing the chambers of commerce of Sacramento, Long Beach, Stockton, Eureka and Crescent City met in Sacramento to complete plans for the visit of six members of the congressional rivers and harbors committee to California during the first week in October. The committee is coming to inspect waterway projects on the Pacific coast.

Machinery for the new molding plant to be operated under the management of H. G. Payne at Alturas has arrived and will be installed in the old Lauer brothers mill, a large building which has only been used for storage purposes for the past several years. The new plant will be capitalized at \$20,000 and will ship most of the output to the eastern market.

Fish "Breeding" Now on Extensive Scale

Until comparatively recent date the Chinese have "bred" fish in the same careful manner as the Canadian breeder improves his horses, cattle, sheep and poultry, and they were without rivals. Among their products was the brush-tail goldfish, a creature of wonderful beauty and form. The fish has long fins which look like lace, while the tail is of an exquisite silky texture, resembling the skirt of a dancer. They are the result of age-long process of breeding and selection. American experimenters working along the same line, but with a view to utility rather than ornament, have successfully mated brook trout with rainbow trout, and steel-head trout with the Dolly Varden variety. Lake fish were made the next subjects and whitefish were crossed with freshwater herring. Now attempts are being made to produce a cross between certain sea fish, such as the cod and the haddock. The shad has a great reputation as a food fish in America, but is as bony as the herring. Shad were therefore crossed with the striped bass, and the young fish have been successfully hatched and liberated in the sea. Whether they will survive and multiply is still a problem, for cross-bred creatures of all sorts seldom reproduce their kind.

Road bonds approximating \$50,000 were declared invalid when Superior Judge Edward I. Butler of Marin county ruled to enjoin the levying of assessments against Corte Madera property holders or the issuance of bonds. The ruling was made on the ground that although all of the preliminary legal steps up to the advertising of the award of contract were made within the law, the city of San Rafael failed to comply with provisions of the law in that step.

Italy's Taxless Houses

The Italian cabinet has approved a decree prolonging through 1928 the regulation granting exemption from taxation on dwelling houses, hotels, stores and offices for a period of twenty-five years from their completion. The exemption originally extended only to buildings completed before the end of 1926. The regulation has been modified, however, to the effect that houses commenced after August 25 must pay one-fifth of the normal tax in 1927, increasing by the same amount each year until the full tax becomes operative after 1940.—Commerce Reports.

Village Long Submerged

Reappearance of a Switzerland village inundated more than 300 years ago was noticed recently at Lake Antrona. A landslide caused the water levels to recede and gradually the ruins of the old village, comprising forty-two buildings, were disclosed. The village of Antrona Piana was flooded by a monster spring freshet and has lain submerged for three centuries.

Dipper's English Alias

The constellation of Ursa Major, the Great Bear, and commonly known as the "Great Dipper," is referred to in England as "Charles' wain" or wagon.—Science Service.

The Reason

Haddit—Your summer home is nowhere near the sea. Why do you call it the Breakers? Spendit—'Cause it broke me.—Philadelphia Bulletin.

Chicago Gets Famed Anchor

Chicago.—The anchor of the Santa Maria, flagship of Columbus, has become the property of the Chicago Historical society.

THE BUSINESS OUTLOOK

A Review of California Conditions from

WELLS FARGO BANK & UNION TRUST CO., SAN FRANCISCO

CALIFORNIA—The agricultural season now drawing to a close has been on the whole one of the most satisfactory in several years. During September weather and climatic conditions were about normal in most sections of the state. Light to moderate showers fell on the 17th and 18th of the month, being heaviest in the Sacramento Valley and central coast counties. Low temperatures and moisture held back the development of rice and cotton and retarded the drying of fruits. Rain early in October injured drying raisins, especially Muscats, few of which were stacked. In southern California the rain was beneficial, especially to citrus crops. Harvesting of grapes, prunes, apples, rice, alfalfa, cotton and other crops continued in September and the first half of October. Cotton picking and ginning are proceeding actively in southern California and the San Joaquin Valley. Vegetables are plentiful in markets and early truck has done well in the Imperial Valley. Livestock continues in excellent condition and the grass is well started on ranges in the North. In most of the rest of California dry feed is sufficient for all needs.

RICE

Although cool weather has retarded maturity of California rice, conditions have allowed good filling of the grain. The forecast on October 1 was 6,026,000 bushels, compared with a production in 1924 of 4,497,000 bushels.

BEANS

Reports on October 1 indicate that only 89,000 acres of Lima beans will be harvested, as compared with July 1 estimate of 91,000, and a production of 874,000 sacks is estimated, compared with 870,000 sacks from 65,000 acres in 1924 and 1,070,000 sacks from 100,000 acres in 1923. Forecast of production of other field beans is approximately 1,061,000 sacks.

COTTON

Condition of the California cotton crop October 1 indicated a production of 114,000 bales, compared with estimate September 1 of 112,000 bales, and a production of 77,946 bales in 1924. A yield of approximately 321 pounds per acre is indicated for this year. The final outcome of the crop is dependent largely upon climatic conditions during October and November. An early frost followed by considerable moisture in central California may curtail production, while comparatively warm, dry weather would make for good yields. Lower California (Mexico) will produce approximately 75,000 bales.

GRAPES

Production of all grapes in California is estimated at 2,013,000 tons, compared with 1,550,000 tons last year and 2,030,000 tons in 1923. Of this amount, the 1925 forecast of raisin grapes is 1,207,000 tons, compared with 900,000 tons in 1924 and 1,290,000 tons in 1923. It is estimated that 241,000 tons of raisin grapes had been shipped fresh up to October 9, which is equivalent to 60,000 tons of cured raisins if dried. Since the amount of raisin grapes that will be shipped fresh cannot be determined it is yet impossible to forecast the cured raisin crop.

OIL
Production of crude oil in California declined 17,000 barrels per day from a daily average of 669,500 barrels to 652,500 barrels during the five weeks ended September 15 to October 13, according to estimates of American Petroleum Institute. On September 21 leading companies announced a reduction of from 10 to 25 cents a barrel in the price of crude oil in southern California and 35 cents a barrel on low gravity crude oils in the San Joaquin Valley. Some of the larger producers are reducing output by shutting down or restricting flow of wells.

SALES OF AUTOMOBILES
Sales of passenger cars and motor trucks in California during the month of September were 14% greater than the same month last year. Passenger car sales increased 18% and commercial car sales 19%.

TIRES
Wholesalers of automobile tires report September orders running ahead of last year, despite extremely heavy purchases in July when price advances were announced.

BUILDING

Fifty-seven leading cities in California record building permits issued in September to the amount of \$31,744,078, compared with \$33,801,926 in August and \$34,189,252 in September, 1924. For the first nine months of this year the same cities issued \$309,349,461 in building permits, compared with \$299,339,307 in the same period of 1924 and \$327,512,120 in the first nine months of 1923.

SAN FRANCISCO—San Francisco department stores report a continuance of satisfactory trade in the first part of October, with sales running higher than last year. Stores are still purchasing for immediate requirements only. Bradstreet's report an improvement in the retail ready-to-wear trade, particularly in men's clothing.

TOURIST TRADE

Jobbers are enjoying better business than last year and collections in most lines are improving. Leading hotels report tourist trade running slightly ahead of last year in September and the first part of October, with excellent bookings for this winter. The year 1925 has so far been a very good one for the local hotel business.

BUILDING

San Francisco issued \$3,158,082 in building permits during September, compared with \$3,840,076 in August and \$5,671,784 for September, 1924. In the first nine months of the present year, San Francisco building permits totaled \$39,318,756, compared with \$39,553,900 in the same period of 1924, and \$34,089,996 in the first three-quarters of 1923.

In the San Francisco Bay area, 11 municipalities issued \$9,849,187 in permits during September, which was slightly less than last September, but showing gains of 48% and 66% respectively over the same month in 1923 and 1922. During the first nine months of 1925, 13 municipalities in the Bay area issued \$90,692,045 in building permits, a gain of 11% over the same period last year and 30% over the first nine months of 1923.

RED CROSS YEAR A RELIEF RECORD

Huge Relief Work After Midwest Tornado the Greatest in American History

DISASTERS DROP IN 1925

Ranged From Fire to Earthquake and Covered Wide Area at Home and Abroad.

Virtual completion of the largest peace-time project of post-disaster rehabilitation ever known has been accomplished by the American Red Cross in less than a year, as a part of its relief work in the more than 90 disasters in which it served in the past year.

This great program was undertaken following the tornado which struck five mid-western States last spring, killing 796 people, injuring 2,239 more, and causing inestimable property loss. It left a huge area of devastation in its wake, presenting a real problem. The Red Cross, however, went to work on the heels of the storm, caring for the injured, sheltering and feeding whole communities, and helping every individual sufferer from the destruction back to normal.

The magnitude of the problem is indicated by comparison of its huge casualty list with that of the entire preceding year, whose combined losses were 736 dead and not quite 2,000 injured, as a result of the record number of 192 catastrophes.

The story of the Red Cross service in the past year, recounted by the report, ranges from fires heading the list of destructive forces with 29 disasters, to mine explosions, tornadoes, typhoons, floods and earthquakes.

The Santa Barbara earthquake was among the outstanding events recorded in the report. The Red Cross had completed its relief organization on the scene within a few hours of the disaster, and in addition had launched a program designed to permanently restore every person affected by it, to his former status once more.

The Red Cross service in the period following the wreck of the Navy ship "Shenandoah" was typical of its promptness and effectiveness. Service in this instance was afforded by Red Cross chapters in the vicinity of the wreck, and by representatives of the national organization. It demonstrates graphically the value of each of the more than 3,000 chapters of the society which are at work in virtually every part of the country, in the facility they afford the national organization in emergencies.

There were 61 domestic disaster operations reported in which the Red Cross rendered service either through chapter or national staff personnel during the year. In 34 of these the national organization appropriated a total of \$3,047,256.49, the greater portion of which was received as direct contributions for the relief of specified disasters. The relief operations following the northern Ohio tornado of June, 1924, were brought to a close in May, 1925, after an arrangement had been made with the Lorain chapter to provide expert services to the families of any tornado sufferers who required such assistance in the next two years. In this single disaster the relief work, as finally accounted, reached a total of \$1,019,751.23.

The mid-western tornado of this year, covering a strip of territory 400 miles long involved an expenditure up to June 30 of \$774,000, while the total amount turned in to the fund through the agency of the Red Cross was \$2,645,000. In addition to this sum specifically collected for the purpose, the Red Cross had expended from its regular reserves \$124,000.

In all these disasters, Red Cross workers have been impressed by the spirit of determination and helpfulness shown by the people. Once they recovered from their grief and bewilderment, they began at once to rebuild, materially and otherwise, and always on a better scale where possible. Another significant feature of these occurrences, as noted in the report of the Red Cross, was the promptness with which the local chapters organized emergency relief before help could be received from outside sources. A direct effect of their example has been to stimulate disaster relief preparedness among chapters all over the country.

The services of the American Red Cross are performed invariably in the name of the American people. On the effectiveness of this representation during the past year, it will launch the ninth annual roll call this year on November 11, to continue until Thanksgiving, November 26, during which support through membership will be invited for 1926.

What Becomes of Red Cross Sweaters
What becomes of the sweaters which the American Red Cross has asked for? In the first place, they are needed for the 30,000 disabled veterans still in hospitals this winter, the garments being in great demand. The surplus left from the war has been exhausted since the Armistice, hence the new call for the sweater-knitters to resume their needles, a call already being met.

The American Red Cross serves in your name; you can make it more effective by adding your name to its membership during the Roll Call, Nov. 11-26.

Noise Affects Babies

Noise and turmoil affect the health and well being of babies as well as grown people, according to a report of the London representative of the American Medical Association. St. Andrews Institute for Clinical Research in a survey of 457 infants found that certain children brought up in noisy and unrestful surroundings failed to thrive in spite of the most careful regulation of diet. With quiet and peace the youngsters recovered and developed normally.

Favorite Royal Lady

Queen Mother Alexandra of Great Britain, whose state of health is a cause for considerable anxiety, is now in her eighty-first year. She was born in Copenhagen, December 1, 1844, and was christened Alexandra Caroline Maria Charlotte Louise Julia. Her father was Prince Christian of Glucksberg, who later became king of Denmark.

Amplifiers in Cathedrals

Westminster abbey, Notre Dame de Paris and the Cathedral of St. John the Divine in New York are now equipped with amplifying systems which carry the voices of the preachers to all parts of their vast auditoriums.—Science Service.

The state department of agriculture announces that Arthur W. Palmer, in charge of cotton futures work for the bureau of agriculture economics of the United States department of agriculture, will be in Sacramento November 3 and 4 to attend the field crops conference of the fifty-eighth fruit growers' and farmers' convention. Palmer will discuss with California cotton growers and officials the question of securing box types and standard classing names for California grown cotton.

A 6-day school for citrus growers will be held at the Chaffey Junior college, San Bernardino county, during the week beginning November 30. This school has been arranged by the state college of agriculture and the county agricultural extension service, in cooperation with Dean C. J. Booth of Chaffey. This will be the most readily accessible school of the kind for growers in eastern Los Angeles, Riverside, Orange, San Diego and Imperial counties.

The federal government's co-operative temperature service for citrus growers will get under way again on November 1 at Visalia, in charge of E. H. Jones, representative of the United States weather bureau, who has been detailed to Tulare county for some years. Through careful cross-sectioning of the citrus district with temperature readings—warnings are available which have heretofore served to prevent frost damage in the orchards.

Fire which destroyed the large Fabian-Fleisig hay and grain warehouse at Tracy, San Joaquin county, was prevented from spreading to other property by the Tracy fire department, which was notified of the blaze by a passing Southern Pacific train crew. Loss of the warehouse and its contents is estimated at \$65,000, only a small part of which is covered by insurance.

The largest sale ever reported for land for cotton raising in California has just been completed by the Kings County Development company. They have sold to Claggett, Gooch and Harris, well known cotton buyers and growers, with offices in Los Angeles and Bakersfield, 8,300 acres of their west side lands in Fresno county, one-half of which acreage is to be set to cotton.

Following a statement by Fred Shaffer, Woodland, secretary of the Yolo County Board of Trade, that the university farm at Davis was not receiving its just due, the Woodland Den of Lions adopted a resolution objecting to the removal of the poultry division to Berkeley, and demanding greater consideration for the Davis branch of the college of agriculture.

SUMMONS

In the Superior Court of the State
of California in and for the County of
Santa Clara.
FLORENCE A. BEMENT, Plaintiff,
vs. CLAUDE G. BEMENT, Defendant.
Action brought in the Superior Court
of the State of California in and for
the County of Santa Clara, and the
Complaint filed in the office of the
Clerk of said County of Santa Clara.

THE PEOPLE OF THE STATE OF
CALIFORNIA send greetings to
CLAUDE G. BEMENT, Defendant.
You are hereby directed to appear
and answer the Complaint in an action,
entitled as above, brought against you
in the Superior Court of the State of
California, in and for the County of
Santa Clara, within ten days after
service on you of this summons, if served
within this County, or within thirty
days if served elsewhere.

And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the Complaint as arising upon contract, or will apply to the Court for any relief demanded in the Complaint.

Given under my hand and the seal of the Superior Court of the State of California, in and for the County of Santa Clara, this 14th day of September, A. D. 1925.

HENRY A. PFISTER,
Clerk.
(SEAL)
By R. I. MCCARTHY,
Deputy Clerk.
